PROFESSIONAL SUMMARY

Statistics postgraduate and professional certified data scientist with strong foundations in Statistical modeling, Machine Learning, Data Science and AI concepts. Skilled in Python, SQL, predictive modeling, recommendation systems, and time-series forecasting. Experienced in data preprocessing, feature engineering, and model evaluation. Seeking a Data Science opportunity to apply analytical skills to real-world business problems.

TECHNICAL SKILLS

Programming (Python) | **Data Analysis** (Pandas • NumPy) | **Machine Learning** (Scikit-learn • Regression • Random Forest • Clustering • Deep Learning) | **Time Series** (ARIMA • SARIMA • Forecasting) | **Databases** (SQL (Joins, CTEs, Window Functions)) | **Visualization** (Matplotlib • Seaborn • Power BI) | **Tools** (Jupyter Notebook • SQL Server • SSMS • Git • GitHub) | **Statistics** (Hypothesis Testing • Regression • ANOVA • Time Series Analysis) | **Cloud** (Basic knowledge of Microsoft Azure)

PROFESSIONAL EXPERIENCE

Cubics Softwares Solution 🌐, *Generative AI Intern*

05/2026 | Remote

I joined as a Generative AI Intern at Cubics Software Solutions, where I started working on a Multi-Agent Chatbot project. I am applying my data science skills while continuously learning and implementing new AI techniques. I am consistently improving my AI expertise by exploring technologies such as LLMs, LangChain, LangGraph, and agentic architectures.

PROJECTS

Netflix Movie Recommendation System 🌐, *Python | Pandas | NumPy | Scikit-learn | SVD*

- Built a collaborative filtering based movie recommendation system using the Netflix Prize dataset containing millions of user ratings.
- Constructed a user-item interaction matrix and analyzed dataset sparsity.
- Applied Singular Value Decomposition (SVD) to extract latent features and model user preferences.
- Performed hyperparameter tuning to improve recommendation accuracy.
- Developed a recommendation function that generates personalized movie suggestions for users.
- Evaluated model performance using RMSE metric to "Achieved an RMSE score of 3.6 for 20 latent features."

Walmart Sales Forecasting (Time Series) 🌐, *Python | Pandas | SARIMA*

- Analyzed 6,400+ weekly sales records across multiple Walmart stores.
- Conducted time series decomposition to identify trend and seasonality patterns.
- Built ARIMA and SARIMA models for forecasting future store sales.
- Generated 12-week sales predictions to assist demand planning.

CSGO Round Winner Prediction 🌐, *Python | Scikit-learn | Preprocessing | Dimensionality Reduction*

- Built a classification model to predict round winners in Counter-Strike Global Offensive matches.
- Performed feature engineering and preprocessing on gameplay variables.
- Trained Logistic Regression, Decision Tree, and Random Forest models.
- Evaluated performance using accuracy, precision, and confusion matrix.
- Achieved an evaluation accuracy score of 87.29%.

EDUCATION

New Arts, Commerce and Science College, Ahilyanagar, *M.Sc. Statistics*

2024 – 2026 | Ahilyanagar, India

R. B. Narayanrao Borawake College, Shrirampur, *B.Sc. Statistics*

2021 – 2024 | Shrirampur, India

CERTIFICATIONS

Advanced Certification in Data Science & AI - Intellipaat (Academic collaboration with IIT Roorkee) 🌐 (Covered: SQL, Python, Machine Learning, Time Series, Deep Learning, Capstone Projects, Basics AI)
